ISO Mounting Instructions

With Windows 8.1 and above the operating system can mount ISO files using the instructions below. This will make the ISO act as a virtual DVD drive and create a drive letter such as E:\.

For Windows Vista and Windows 7 please see the next section titled **ISO Extraction Instructions**.

- 1) Navigate to the location where you have saved the ISO file.
- 2) Right-click on the ISO file and then select **Mount** option mount it.

Note: If you do not see the option Mount then the .ISO file type is likely associated with another program.

Navigate to the Open with and Select Windows Explorer.

⊡ SAS_9.4 _.	TS1M	15 Rev 940 17w43 Windows Workstation fr	nr X	64_Disk_1_of_6.iso
💷 SAS_9.4		Open	G	64_Disk_2_of_6.iso
⊡ SAS_9.4		7-Zip	> a	64_Disk_3_of_6.iso
💷 SAS_9.4		CRC SHA	> a	64_Disk_4_of_6.iso
⊡ SAS_9.4	2	Edit with Notepad++	C.	64_Disk_5_of_6.iso
⊡ SAS_9.4	Ð	Scan with Windows Defender	Q	64_Disk_6_of_6.iso
		Edit with Vim		
		Open with	>	😰 7-Zip File Manager
		Restore previous versions		⊌ ImgBurn - The Ultimate Image Burner!
		Send to	5	🐂 Windows Explorer
		Cut		🟦 Search the Store
		Сору		Choose another app
		Create shortcut		
		Delete		
		Rename		
		Properties		

- 3) You should now see a new window with the contents of the mounted ISO file. If not, double-click on the new virtual drive in This PC (Computer/My Computer) to access ISO file contents.
- 4) To unmount, right-click on the virtual drive in This PC (Computer/My Computer) and then select Eject option.

ISO Extraction Instructions

1) Download 7-Zip. It is available for free from the following website: http://www.7-zip.org/

2) **Right click** on the file you have downloaded and choose **Open with** - **7 Zip File Manager**. A new window will open, which lists all the contents of your ISO file (that you have downloaded).

3) Click **Extract.** (Note: Each disk needs to be extracted to a separate folder such as Disk 1, Disk 2 ...)
